

Single Patient Room Sponsorship Program

With the growing challenges nosocomial infections place on healthcare today, St. Mary's is taking bold steps to address this issue. I am pleased to announce that as an integral part of the Campus Development Program, patient rooms will be reconstructed to provide for private and semi-private patient care.

This will not only ensure optimum patient care through providing family privacy, dignity and comfort, it will also dramatically improve the quality of work life for staff and physicians.

Many of our benefactors have expressed an interest in supporting this effort.

In response, we have created a program of sponsorship whereby individuals or groups may support the reconstruction and equipping of single and semi-private patient care room with a commitment of \$100,000.

In recognition, the St. Mary's Hospital Foundation will dedicate the room and install a plaque in the name of the donor.

We are pleased to announce that the first conversions to private and semi-private patient rooms are in the Medical Unit and we continue to receive Sponsorship commitments from several donors.

We would be honoured to have your support.
